

BERKLEY RISK ADMINISTRATORS COMPANY, LLC

Berkley Risk provides its customers with the tools, expertise and proven methods to reduce the cost of risk.

A BERKLEY
COMPANY

OUR MISSION

We reduce our customers' cost of risk by providing the highest level of professional services possible. Our employees understand each customer's unique business needs, and know that our future success is tied to continuing that highly skilled, personalized and dedicated effort.

COMPANY DESCRIPTION

Berkley Risk Administrators Company, LLC is a nationwide provider of risk management services. We offer comprehensive tools to reduce both the frequency and severity of claims. Additionally, we structure and manage loss sensitive insurance products which allow our customers to further benefit from reductions in the cost of claims.

Claims Services We are a national third-party administrator of workers' compensation and property and casualty claims, adjusting over 100,000 claims annually. We strive to reduce the cost of claims by maintaining a highly experienced staff of claims adjusters, using comprehensive medical cost containment strategies, and minimizing allocated loss adjustment expenses.

We offer customer access to data through an online portal called eTools, which provides claim file details, adjuster notes, and data exports in both Adobe™ and Excel™. We also offer ad hoc reporting capabilities.

We provide claim services to a variety of organizations, including self-insureds, captives, governmental entities, risk retention groups, and insurance companies.

Loss Control We offer loss control both in conjunction with our claims services and on an unbundled basis. We focus on behavior based loss control services augmented by physical surveys. Our loss control experts work hand-in-hand with our claims services and underwriters allowing us to identify and mitigate negative trends.

Alternative Risk Management We structure a variety of alternative risk management strategies using "best practice" methods, which focus on an efficient means to capture "cost-of-risk" reductions. These alternative solutions include captives, risk retention groups, large deductibles and other loss sensitive insurance products.

Program Management We provide management services to a broad set of insurance entities, including assigned risk plans, public entity pools, captives, and self-insured groups. In addition to providing claims and loss control services, we provide: statutory and GAAP accounting, policy issuance, statistical reporting, reinsurance management and underwriting. We are the nation's second largest servicing carrier for workers' compensation Assigned Risk Plans.

HOW BERKLEY RISK IS DIFFERENT

Flexibility in the development of effective client solutions through a wide range of specialized professional services, access to high quality issuing carriers and reinsurers, actively monitoring performance, and fiscal responsibility are the key components that allow us to produce demonstrable results. Our employees take personal pride in their highly collaborative partnership with each customer. Understanding their culture and business needs results in long-term customer retention and shared satisfaction. We are a member company of W. R. Berkley Corporation, recognized as one of the most respected names in the property casualty insurance industry.

FINANCIAL HIGHLIGHTS

Berkley Risk operates countrywide with locations in 15 states, and employs approximately 550 employees.
